

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **A. Conclusion**

This research aims to improve students' speaking skills by using Canva for class XI students at SMAS Hidayatul Muhsinin, especially class XI for the 2022/2023 academic year. Based on the research results, it can be concluded that:

Based on the research that researcher have done, Canva can help improve students' speaking skills in learning English. This can be seen from the observation sheets and field notes at each meeting in each cycle. Students pay attention and focus. Students show learning progress in each cycle. In cycle I students showed were quiet active, and there was an increase from cycle I to cycle II.

Additionally, researcher who used Canva in the first and second cycles of teaching and learning observed that the observation sheet and field notes provided by students after they learned and used Canva in the classroom allowed them to track their development and level of engagement. After using Canva in the classroom, students' English-speaking abilities improved.

It has been said that the improvement in the speaking skills of class 11 students at Hidayatul Muhsinin High School is quite good. This can be seen from the students' average speaking test score of 50.6 for the first cycle, while the second cycle reached 63.7. which means that the use of Canva media to improve students' speaking skills was successful.

#### **B. Suggestion**

In the process of teaching and learning, the role of the media is needed to support the material delivered by the teacher. Although the success of learning does not fully occur due to the use of media during the learning process. However, the media is also very important to use and besides that

the teacher's strategy in teaching is also very necessary for good classroom mastery, active and interactive interactions between teachers and students, and how to convey material. Based on research findings and observations in this research, suggestions that researcher can give include:

#### 1. To School

Schools must be able to facilitate the use of media to support teaching and learning activities, schools can use visual, audio and audio-visual media to provide good learning to students. For this reason, researcher suggest using canva for schools for better learning.

#### 2. To The Teacher

Teachers must be able to use and choose media properly and wisely, because media can play a role in helping to increase focus, motivate and attract students' attention in the learning process. Therefore, researcher suggest teachers to use canva in the learning process, especially to improve students' speaking skills.

#### 3. To Other Researchers

In research, good concepts and strategies are needed to collect and process existing data, the researcher hopes that the results of this research can help other researchers in the future to become a source of reference and knowledge. In improving students' speaking skills in class, especially using canva media or other media that can provide benefits for the development of science and technology so that it can help in developing better education in indonesia and even in the world.

#### 4. To Students

Students must have perseverance, discipline, passion and motivation in learning. Students are expected to pay good attention to the teacher, focus and be more active in learning activities. In speaking english, students must be confident, understand what they want to say, and be able to convey the meaning of what they say.
