

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the finding and discussion of research supported by data that has been carried out, it can be concluded that in general the use of a genre-based approach as a method in teaching English is very useful and really helpful in the process of learning English. The genre-based approach plays an important role in helping students to improve students' understanding skills, this can be seen from the increase in students' basic knowledge of English, especially vocabulary. And by using a genre-based approach, students seem more enthusiastic and really enjoy the process of learning English. This shows that it is necessary to use a genre-based approach as a method in the process of learning English.

Regarding the problems that occur to students in the teaching and learning process, it was found that some students had difficulties in carrying out independent construction. However, there are also those who are able to carry out independent construction but still need more guidance. This shows the importance of learning methods to produce effective learning activities so that students can learn English better.

B. Suggestion

Based on the research results and conclusions, there are several suggestions as follows:

1. The village head must provide full support for educational programs in the village environment in order to advance the intellectual abilities of the village community through education.
2. The researchers suggested that students are advised to use cartoons as an alternative learning resource that supports the learning process.
3. The results of this study are expected to be a reference for further research in the same field.
