

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **A. Conclusion**

Based on the results and discussion of research supported by data that has been carried out, it can be concluded that the use of genre pedagogy, explicit teaching, guidance, and learning materials in teaching helps students in learning English. As explained in the discussion in chapter four, the main conclusion of this study is that English language teaching in the English Village of Air Putih Village has been successful. During the teaching and learning process, the tutor always creates a pleasant learning atmosphere by teaching English material such as teaching students to introduce themselves in English, teaching students to sing in English, and teaching students to read stories in English. The student response was very positive and the students were very enthusiastic about participating in the learning process in the English Village of Air Putih Village. This can be proven by the enthusiasm of students in answering questions from the tutor.

Regarding the problems that occur to students in the teaching and learning process, the tutor found some students who had difficulty pronouncing English vocabulary independently. However, some can pronounce English vocabulary independently but still need guidance from a tutor. This shows the importance of learning methods to produce effective learning activities so that students can learn English well. In addition to learning methods that must be considered, learning media are also important to support students' learning English. Like learning in the English Village of Air Putih Village, tutors use various media to make it easier for students to learn English.

## **B. Suggestions**

Based on the results of the research and conclusions, there are several suggestions as follows:

1. The village chief must provide full support for educational programs in the village environment to advance the intellectual abilities of the village community through education.
2. Students, it is suggested advisable to apply the learning that has been taught in the English Village program in Air Putih Village to everyday life.
3. The results of this study are expected to be a reference for further research in the same field.
